BLIND KIT

Design, elegance and a touch of modernity are the special features of our range of Basic and customisable Multi-edge blind ranges, made from plastic materials, and the new Metallic, Multipurpose-Bathroom and XXL blind ranges made from aluminium. They are all fitted to the front of the module, without the need for any machining, so our Kit system is easy to use and quick to assemble. Our method for assembling the slats has been tested by the most demanding manufacturers, and the results have been excellent, so we can give a full guarantee about the absence of breakage.

Permanent

stock, immediate delivery.

XXL custom Blind kit

Following the latest trends in furniture and decoration design, XXL are high quality blinds, custom made to be able to fit all spaces, including large ones. Made with metallic aluminium profiling, they come with a choice of three finishes (chrome, steel or aluminium) and the slats come in a steel or aluminium colour, or even a translucent 3D glass effect. The kit is sold in a cardboard box with the instructions and all the components needed to easily fit it. The blind is pre-assembled with our Roll-Box system, ready to be fitted to the furniture, making it easy and quick to assemble. The speed at which the blind drops is controlled through a shaft equipped with an adjustable tensioning system.

Reference **06KIT30XXL**

We recommend tailoring your 3D glass effect blind kit with our entire range of “Acrilac” edges.

You can personalise your blind kit with more than 500 colours and designs, see our catalogue of 1mm thick edges.

We can make your blind up to a maximum of 150cm in width and 150cm in height. Ask us about prices and delivery times.
